Important Safety Instructions

To reduce the risk of injury or damage, read these safety instructions carefully and keep them at hand when setting up, using and maintaining this device.

**WARNING SYMBOLS USED**

This is the safety alert symbol. This symbol alerts you to potential hazards that could result in property damage and/or serious bodily harm or death.

- This device is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the device by a person responsible for their safety.
- Children should be supervised to ensure they do not play with the device.
- Cleaning and maintenance shall not be performed by children without adult supervision.
- This device can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the device in a safe way and understand the hazards involved.
- The device is only to be used with the power supply unit provided.
- For the purposes of recharging the battery, only use the detachable power supply unit provided with this device.
- The battery must be removed from the device before the device is disposed of. To remove the battery from the device, unscrew the battery cover using a screwdriver. Remove the battery by disconnecting the quick connector.
- The used battery should be placed in a sealed plastic bag and disposed of safely according to local environmental regulations.
- The external flexible cable or cord of the power supply unit cannot be replaced; if the cord is damaged, the power supply unit shall be disposed of.
- This device is for indoor use only.
- This device is not a toy. Do not sit or stand on this device. Small children and pets should be supervised when this device is operating.
- Store and operate this device in room temperature environments only.
- Clean with a cloth dampened with water only.
- Do not use this device to pick up anything that is burning or smoking.
- Do not use this device to pick up spills of bleach, paint, chemicals, or anything wet.
- Before using this device, pick up objects like clothing and loose paper, lift up cords for blinds or curtains, and move power cords and fragile objects out of the way. If the device passes over a power cord and drags it, an object could be pulled off a table or shelf.
- If the room to be cleaned has a balcony, a physical barrier should be used to prevent access to the balcony and to ensure safe operation.
- Do not place anything on top of this device.
- Be aware that the device moves around on its own. Take care when walking in the area where the device is operated to avoid stepping on it.
- Do not use this device on an unfinished, unsealed, waxed or rough floor. It may result in damage to the floor and the device. Use only on hard floor surfaces or low-pile carpet.
- Do not operate the device in areas with exposed electrical outlets on the floor.
- Do not expose the electronics of this device, its battery, or the integrated Charging Base. There are no user-serviceable parts inside.
- This device has been designed to be used on floors without scratching them. We still recommend that you test the device on a small area to ensure no scratches are left before cleaning the whole room.
About Your RoboVac

Charging contact pins  Drop sensors

Swivel wheel  Side brushes

Battery cover  Wheels

Brush guard  Rolling brush

Dust collector
Using Your RoboVac

Important Tips Before Use

Remove power cords and small objects from the floor that may entangle RoboVac. Remove rugs that are thicker than 0.4 in/10 mm as they may cause RoboVac to malfunction. Fold tasseled edges of area rugs underneath to prevent tangling RoboVac. Do not use RoboVac on middle or long-pile carpeting.

Avoid cleaning spaces lower than 3.9 in/98 mm to prevent RoboVac from getting stuck.

Prevent liquid from entering RoboVac as it may cause damage.

Anti-drop sensors prevent RoboVac from tumbling down stairs and steep drops. They may work less effectively when they are dirty, or on reflective/dark-colored floors. It is recommended to place a physical barrier to block off problem areas where the device may fall.

Install 2 AAA batteries before using the remote control for the first time. Make sure the positive and negative ends are facing the correct polarity direction as marked in the battery compartment.
Before You Start

1. Remove the protective film covering RoboVac and the Charging Base.

2. Flip RoboVac over and snap on the side brushes.

Install the Charging Base

1. Place the Charging Base on a hard, level surface and against a wall.

2. Remove objects within 3 ft/1 m of the left and right side and within 6 ft/2 m of the front of the charging base.

3. Connect the round connector of the adapter into the power socket on the Charging Base and the other end into a wall outlet.

- Install the Charging Base in a location that RoboVac can easily access.
- Always keep the Charging Base plugged in, otherwise RoboVac will not automatically return to it.

Charge Your RoboVac

• RoboVac has a pre-installed rechargeable battery that has to be fully charged before use.
• RoboVac returns to the Charging Base at the end of a cleaning cycle or when its battery is running low.
• Manually charge RoboVac when its battery is fully discharged or if it fails to reach the Charging Base.

Method 1: Attach RoboVac to the Charging Base by aligning its charging pins with the charging pins on the base.
Start/Stop Cleaning

1. Turn on the main power supply
Press the power switch on the side of RoboVac to turn on the main power supply.

2. Start cleaning
Press \( \text{on RoboVac or } \text{on the remote control to start cleaning in Auto mode.} \)

When the system is idle for 10 minutes, RoboVac switches to Standby Mode automatically to save power.

3. Stop cleaning
Press \( \text{on RoboVac or } \text{on the remote control to stop cleaning.} \)

Select a Cleaning Mode

1. Auto cleaning
RoboVac calculates the room size and optimizes its path by selecting different cleaning modes automatically until cleaning is complete.
Press \( \text{on RoboVac or } \text{on the remote control to start cleaning in Auto Mode.} \)
2. Spot cleaning
RoboVac intensively cleans a specific area in a spiral pattern. Useful if there is a concentrated area of dust or debris.
Press Spot on the remote control to start cleaning in Spot Mode.

3. Edge cleaning
RoboVac reduces its speed when it detects a wall and then follows the wall to ensure the edge is cleaned thoroughly.
Press Edge on the remote control to start cleaning in Edge Mode.

4. Single Room cleaning
RoboVac intensively cleans one single room and stops when cleaning is complete. Select this mode only when one specific room needs to be cleaned. Make sure to confine RoboVac to the room by closing the door.
Press Single Room on the remote control to start cleaning in Single Room Mode.

5. Max cleaning
RoboVac starts Auto cleaning with the maximum suction power. This is ideal for cleaning carpets.
Press MAX on the remote control to start cleaning in Max Mode.

6. Manual cleaning
You can direct RoboVac to clean a particular area by using the directional buttons on the remote control.
Schedule Cleaning

With the EufyHome app, you can schedule RoboVac to start cleaning at a particular time.

- You can set the time and customize the cleaning schedules from Monday to Sunday on the EufyHome app. This function is available in the app only.
- Cleaning schedules are erased when RoboVac is powered off. If RoboVac is powered on without Internet access, cleaning schedules will not synchronize and must be reset via the app.

Use Your RoboVac with EufyHome App

To enjoy full features, it is recommended to control your RoboVac via the EufyHome app.

Before you start, make sure that:

- Your smartphone has been connected to your home Wi-Fi network.
- RoboVac is attached to the charging base to ensure it has enough power during setup.
- Your smartphone is running iOS 8.0 (or above) or Android 4.3 (or above).
- The Wi-Fi status light on RoboVac is flashing blue.

1. Download the EufyHome app from the App Store (iOS devices) or Google Play (Android devices).
2. Open the app and create a user account.
3. Tap “+” on the top right to add RoboVac to your EufyHome account.
4. Follow the instructions in the app to set up Wi-Fi connection.

- After connecting successfully, you can control RoboVac via the app.
- With the app, you can select a cleaning mode, set the time, schedule a cleaning, learn the system status, receive notifications and access additional features.

Wi-Fi Status Light

<td>Connected with your wireless router</td>
</tr>
</tbody>
</table>

Use Your RoboVac with Amazon Alexa (Optional)

Alexa is Amazon’s smart voice control device that enables you to control RoboVac with your voice.

Before you start, make sure that:

- RoboVac is attached to the charging base to ensure there is enough power.
- RoboVac is connected with the EufyHome app.
- You have an Alexa-enabled device (sold separately) such as Amazon Echo, Echo Dot and Amazon Tap.
- The Alexa app is already installed on your smart device, and you have created an account.

Reset the Wi-Fi Connection

Press and hold on RoboVac for 10 seconds to reset the Wi-Fi connection if necessary.

- You will hear a beep when Wi-Fi has been reset.

Troubleshooting Wi-Fi Connection

- If you have any problem with Wi-Fi setup, refer to this section.
- If RoboVac gets stuck in any space, tap Find My Robot on the app to find the machine. This function is available on the app only.
Cleaning and Maintenance

Clean the Dust Collector and Filters

1. Press the dust collector release button to pull the dust collector out.
2. Open and empty the dust collector.
3. Separate the filter cover by pulling the hooks as shown.

Press the filter door release button to open the filter door and take out the filters.

Clean the dust collector and filter with a vacuum cleaner or a cleaning brush.

Put the filters and filter cover back together in the dust collector and close the filter door.

Push the dust collector back into the main unit.

For more information about how RoboVac 11c works with Amazon Alexa, go to www.eufylife.com/products/robovac-11c.

Amazon Alexa service is available in English only now. More languages may be available later with the update of the service.

- It is recommended to empty the dust collector and clean the filter after every use.
- You can wash the dust collector, filter cover and foam filter with water. Be sure to air-dry them thoroughly before reassembling. Do not wash the HEPA-Style filter with water, as it may damage the filter and reduce the suction power.
Clean the Rolling Brush

1. Pull on release tabs to unlock brush guard as shown.
2. Lift the rolling brush to remove.
3. Clean the rolling brush with the provided cleaning tool or a vacuum cleaner.
4. Reinstall the rolling brush by inserting the fixed protruding end first, then clicking into place.
5. Press down to snap the brush guard into place.

Clean the Side Brushes

Foreign substances, such as hair, can easily get tangled in the side brushes, and dirt may adhere to them. Be sure to clean them regularly.

- Carefully unwind and pull off any hair or string that is wrapped between the main unit and the side brushes.
- Use a cloth dampened with warm water to remove dust from the brushes or to gently reshape them.

Use the side brushes only when they are completely dry.

Replace the Side Brushes

The side brushes may become bent or damaged after using for a period of time. Follow the steps below to replace them.

- Pull off the old side brushes and snap the new ones into place.

Clean the Sensors and Charging Pins

To maintain best performance, clean the drop sensors and charging pins regularly.
- Dust off the drop sensors and charging contact pins using a cloth or cleaning brush.

Wi-Fi Connection

Before Wi-Fi setup, make sure RoboVac and your Wi-Fi network meet the following requirements.

Wi-Fi Setup Requirements

1. RoboVac:
   - RoboVac is fully charged and the main power switch on the side of RoboVac is turned on.
   - Wi-Fi status light flashes blue slowly.

2. Wi-Fi network:
   - Use the correct password for your network.
   - Do not use a VPN (Virtual Private Network) or Proxy Server.
   - Your Wi-Fi router supports 802.11 b/g/n and IPv4 protocol.
   - Your router is either 2.4GHz or a dual band router that is configured to support 2.4 GHz. RoboVac does not support 5 GHz band.
     - If RoboVac cannot connect to the Wi-Fi network and you are using a 2.4/5 GHz mixed network, switch to a 2.4 GHz network for Wi-Fi setup. You can switch back once your setup is complete.
     - When connecting to a hidden network, make sure that you have used the correct network name, SSID (case sensitive), and that the wireless frequency is 2.4GHz.
     - When using a network extender/repeater, make sure the network name (SSID) and password are the same as your primary network.
   - The firewall and port settings of your Wi-Fi router allow RoboVac to connect with the Eufy servers.

   • Network Security Requirement
     - WPA and WPA2 using TKIP, PSK, AES/CCMP encryption.
     - WEP EAP (Enterprise Authentication Protocol) is not supported.

   • Wi-Fi Channels
     - The FCC requires all wireless devices in the United States are operated on wireless spectrum channels 1-11.
     - Some countries outside North America can use spectrum channels above channel 11. Refer to your local regulatory agency to determine which channels are accessible.
     - A future software release will support access to channels above 11 for users outside North America. Until then, use channels 1-11.

If you cannot control RoboVac with your smartphone, find the solutions below to solve the problem. If the problem persists, contact the Eufy service center for help.

Notice

The symbol on the product or its packaging indicates:

Do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities. Contact your local authority for information regarding the collection systems available. If electrical appliances are disposed of in landfills or dumps, hazardous substances can leak into the groundwater and get into the food chain, damaging your health and well-being. When replacing old appliances with new ones, the retailer is legally obliged to take back your old appliance for disposal at least free of charge.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: (1) Reorient or relocate the receiving antenna. (2) Increase the separation between the equipment and receiver. (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. (4) Consult the dealer or an experienced radio / TV technician for help.
