

- When the switch is turned to the left, the Power LED Light and the Surge Protector Light will both activate.
- When the switch is turned to the right, both LED lights will go out. The device is powered off.
- **Tip 1:** The surge protection feature can protect your computers, smartphones and other electronic equipments against voltage fluctuations, surges and spikes. If the Surge Protector Light is off, it indicates the surge protector is not functioning normally.
- **Tip 2:** In the event of a power overload, the Overload Protection Switch will cut off the power automatically.
