About Your RoboVac

What's in the Box

- RoboVac 11c Pet Edition
- Charging Base
- Remote Control (AAA Battery ×2)
- Power Adapter
- Cleaning Tool
- Boundary Strips (6.6 ft/2 m length)
- Additional Side Brushes (×2)
- Additional High-Performance Filter
- Additional Foam Filter
- Safety Leaflet
- Owner's Manual
- Quick Start Guide

RoboVac Anatomy

Top & Side

- Auto cleaning On/Off button
- Bumper
- Wi-Fi status light
- Infrared sensor
- Main power switch (On/Off)
- Dust collector
- Dust collector release button

Bottom

- Charging contact pins
- Drop sensors
- Swivel wheel
- Side brushes
- Wheels
- Brush guard
- Rolling brush
- Dust collector
Dust Collector

- Filter cover
- Foam filter
- High-performance filter

Charging Base

- Status light
- Charging contact pins
- Power socket

Suction Inlet

- Dust collector
- Suction inlet

Remote Control

1. Return RoboVac to Charging Base
2. Start/Stop Auto cleaning
3. Control cleaning direction manually
4. Adjust the hour and minute
5. Start Spot cleaning
6. Start Edge cleaning
7. Start Single Room cleaning

Install 2 AAA batteries before using the remote control for the first time. Make sure the positive and negative ends are facing the correct polarity direction as marked in the battery compartment.
Using Your RoboVac

Important Tips Before Use

1. Remove power cords and small objects from the floor that may entangle RoboVac.
2. Remove rugs that are thicker than 0.87 in/22 mm as RoboVac may get trapped. Fold tasseled edges of area rugs underneath to prevent tangling RoboVac. Do not use RoboVac on high-pile carpeting.
3. Avoid cleaning spaces lower than 3.9 in/100 mm to prevent RoboVac from getting stuck.
4. Keep RoboVac away from wet areas.
5. RoboVac may climb on top of objects less than 0.67 in/17 mm in height. Remove these objects if possible.
6. Anti-drop sensors prevent RoboVac from tumbling down stairs and steep drops. They may work less effectively when they are dirty, or on reflective/dark-colored floors. Although the Boundary Strips can be applied to block off the areas you do not want RoboVac to clean, they should not be solely relied upon to avoid a potentially dangerous situation. In such cases, it is recommended to place a physical barrier to block off problem areas where the device may fall.

Install the Charging Base

1. Place the Charging Base on a hard, level surface and against a wall.
2. Remove objects within 3 ft/1 m of the left and right side and within 6 ft/2 m of the front of the Charging Base.
3. Connect the round connector of the adapter into the power socket on the Charging Base and the other end into a wall outlet.

- Install the Charging Base in a location that RoboVac can easily access.
- Always keep the Charging Base plugged in, otherwise RoboVac will not automatically return to it.
- The LED indicator on the Charging Base is SOLID GREEN when RoboVac is NOT docked.
- The LED indicator on the Charging Base is OFF when RoboVac is docked.
Charge Your RoboVac

• RoboVac has a pre-installed rechargeable battery that has to be fully charged before use.
• RoboVac returns to the Charging Base at the end of a cleaning cycle or when its battery is running low.
• Make sure the main power switch on the side of RoboVac is turned on before charging.

Method 1: Attach RoboVac to the Charging Base by aligning its charging pins with the charging pins on the base.

Method 2: Press 🏡 on the remote control to return RoboVac to the Charging Base.

Start / Stop Cleaning

1. Turn on the main power supply
Press the main power switch on the side of RoboVac to turn on the main power supply.

2. Start cleaning
Press ◼️ on RoboVac or ◼️ on the remote control to start cleaning in Auto Mode.

3. Stop cleaning
Press ◼️ on RoboVac or ◼️ on the remote control to stop cleaning.

Select a Cleaning Mode

1. Auto cleaning
RoboVac automatically cleans in a back-and-forth, straight-line pattern. This is the most commonly used cleaning mode.
Press ◼️ on RoboVac or ◼️ on the remote control to start cleaning in Auto Mode.

- RoboVac will return to the Charging Base automatically when the power level becomes low or when RoboVac finishes cleaning.
- By default, RoboVac starts in Auto cleaning mode when it is turned on.

(Status Light) | Status
---|---
Breathing blue | Charging
Solid blue | Standby / Cleaning / Returning to Charging Base
Solid purplish-red | Low power and returning to Charging Base
Flashing / Solid red + Beeping | RoboVac has an error
Off | RoboVac is off. To conserve power, the light automatically turns off:
When RoboVac is not docked to the Charging Base and has been inactive for 10 minutes;
After RoboVac is docked to the Charging Base and has been fully charged for 10 minutes.

- When charging RoboVac, press and hold ◼️ on RoboVac for 20 seconds and when you hear two beeps, indicating that RoboVac has entered Reduced Power Standby mode; Wi-Fi is disabled in this mode. Press ◼️ to exit Reduced Power Standby mode.
- Turn off the power switch if RoboVac will not be used for a long period of time. To preserve the battery’s lifespan, recharge at least once every 3 months.
Power Boost Feature

When the Power Boost feature is enabled, RoboVac will automatically increase the suction power if it detects stronger power is needed to ensure the best clean. Power Boost is ideal for cleaning thicker carpets and hard-to-sweep messes, which will reduce the total cleaning time, but increase the noise level. If the vacuuming noise caused by Power Boost disturbs you, you can disable this feature. This feature only works in Auto cleaning mode.

To adjust the default suction power in Auto Cleaning mode, simultaneously press and hold the ⬆️ and ⬇️ buttons for 2 seconds; you will hear a series of beeps that correspond to the suction power selected. Repeat to adjust the suction power level.

<table>
<thead>
<tr>
<th>Sound</th>
<th>Power Boost</th>
<th>Suction Power Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>One beep</td>
<td>Off</td>
<td>Standard power</td>
</tr>
<tr>
<td>Two beeps</td>
<td>On</td>
<td>Automatically switches between Standard and Enhanced power (default)</td>
</tr>
<tr>
<td>Three beeps</td>
<td>Off</td>
<td>Maximum power</td>
</tr>
</tbody>
</table>

When RoboVac starts Auto cleaning the next time, it will clean according to the suction power level you previously selected.

2. Spot cleaning

RoboVac intensively cleans a specific area in a spiral pattern. Useful if there is a concentrated area of dust or debris. In Spot mode, RoboVac will stop cleaning after 2 minutes.

Press 🏠 on the remote control to start cleaning in Spot mode.

3. Edge cleaning

RoboVac reduces its speed when it detects a wall and then follows the wall to ensure the edge is cleaned thoroughly. In Edge mode, RoboVac will clean for 20 minutes and return to the Charging Base.

Press 🏡 on the remote control to start cleaning in Edge mode.

4. Single Room cleaning

RoboVac intensively cleans one single room and stops after 30 minutes. Select this mode only when one specific room needs to be cleaned. Make sure to confine RoboVac to the room by closing the door.

Press 🏡 on the remote control to start cleaning in Single Room Mode.
5. Manual cleaning

You can direct RoboVac to clean a particular area by using the directional buttons on the remote control.

Schedule Cleaning

With the EufyHome app, you can schedule RoboVac to start cleaning at a specific time.

Use Your RoboVac with the EufyHome App

To enjoy all available features, it is recommended to control your RoboVac via the EufyHome app.

Before you start, make sure that:

• Your smartphone or tablet is connected to a Wi-Fi network.
• Your smartphone or tablet is running iOS 8.0 (or above) or Android 4.3 (or above).
• Your Wi-Fi router supports the 2.4GHz and 802.11b/g/n bands; the 5GHz band is not supported.
• RoboVac is attached to the Charging Base to ensure it has enough power during setup.
• Your smartphone is running iOS 8.0 (or above) or Android 4.3 (or above).
• The Wi-Fi status light on RoboVac is slowly flashing blue.

Reset the Wi-Fi Connection

Press and hold on RoboVac for 10 seconds to reset the Wi-Fi connection if necessary.

- You will hear a beep when the Wi-Fi connection has been reset and the Wi-Fi status light will slowly flash blue. Now you can follow the Wi-Fi instructions in the EufyHome app to set up the Wi-Fi connection.
Use Your RoboVac with Amazon Alexa / the Google Assistant (Optional)

Amazon Alexa or the Google Assistant is a smart voice control device that enables you to control RoboVac with your voice.

Before you start, make sure that:

- RoboVac is attached to the Charging Base to ensure there is enough power.
- RoboVac is connected with the EufyHome app.
- You have an Alexa-enabled device (i.e. Eufy Genie, Amazon Echo, Echo Dot and Amazon Tap) or a device enabled with the Google Assistant (i.e. Google Home). These devices are sold separately.
- The Amazon Alexa app or Google Home app is already installed on your smart device, and you have created an account.

To control RoboVac with Amazon Alexa:

1. Open the Amazon Alexa app and select “Skills” from the menu.
2. On the Skills screen, search for “EufyHome - RoboVac”.
3. Once you have found the “EufyHome - RoboVac” skill, tap Enable.
4. Login with your EufyHome account so that Alexa can control your RoboVac.
5. Say simple commands to Alexa:

   “Alexa, ask RoboVac to start cleaning.”
   “Alexa, ask RoboVac to stop cleaning.”
   “Alexa, ask RoboVac to go home.”
   “Alexa, ask RoboVac to find my robot.”

To control RoboVac with the Google Assistant:

RoboVac now works with the Google Assistant on devices like the Google Home.

1. Open the Google Home app.
2. Say “Ok Google, talk to RoboVac” to the Google Assistant-enabled device to initiate the Google action for RoboVac.
3. Follow the instructions in the Google Home app to authorize the Google Assistant with your EufyHome account.
4. To control RoboVac with your voice, say simple commands to Google Assistant.

   “Ok Google, ask RoboVac to start cleaning.”
   “Ok Google, ask RoboVac to stop cleaning.”
   “Ok Google, ask RoboVac to go home.”
   “Ok Google, ask RoboVac to find my robot.”

- For more information about how RoboVac works with Amazon Alexa / the Google Assistant, visit https://www.eufylife.com and go to PRODUCTS>Cleaning>RoboVac 11c Pet Edition for details.
- The Amazon Alexa / Google Assistant service is currently available in English only. More languages may be available later with the update of the service.
Use the Boundary Strips

With the Boundary Strips, you can keep RoboVac away from any area or item you do not want RoboVac to clean. RoboVac will recognize the Boundary Strips and not cross into the blocked-off area.

1. Identify the area or item you do not want RoboVac to clean.
2. If necessary, use scissors to cut the Boundary Strips to a shorter length. Be sure to correctly measure the length before cutting.
3. Apply an adhesive tape to lay the boundary strips flat on the floor. Make sure the strips are placed FLAT on the floor.

- If the Boundary Strips are rolled up, remove and then re-apply on the floor with an adhesive tape. Otherwise the Boundary Strips may not work well.
- Be careful not to damage the floor when using adhesive tape. It is not recommended for use on carpets.
- Keep the Boundary Strips away from objects that emit excessive heat.

Cleaning and Maintenance

Clean the Dust Collector and Filters

1. Press the dust collector release button to pull the dust collector out.
2. Open and empty the dust collector.
3. Separate the filter cover by pulling the hooks as shown.
4. Take out the foam filter and high-performance filter.
5. Clean the dust collector and filters with a vacuum cleaner or a cleaning brush.
6. Put the filters and filter cover back together in the dust collector.
Push the dust collector back into the main unit.

- It is recommended to empty the dust collector and clean the filter after every use.
- You can wash the dust collector, filter cover and foam filter with water. Be sure to air-dry them thoroughly before reassembling. Do not wash the high-performance filter with water, as it may damage the filter and reduce the suction power.

Clean the Rolling Brush

1. Pull on release tabs to unlock the brush guard as shown.
2. Lift the rolling brush to remove.
3. Clean the rolling brush with the provided cleaning tool or a vacuum cleaner.
4. Reinstall the rolling brush by inserting the fixed protruding end first, then clicking into place.
5. Press down to snap the brush guard into place.

Clean the Sensors and Charging Pins

To maintain best performance, clean the drop sensors and charging pins regularly.
- Dust off the drop sensors and charging contact pins using a cloth or cleaning brush.

Clean the Side Brushes

Foreign substances, such as hair, can easily get tangled in the side brushes, and dirt may adhere to them. Be sure to clean them regularly.

1. Carefully unwind and pull off any hair or string that is wrapped between the main unit and the side brushes.
2. Use a cloth dampened with warm water to remove dust from the brushes or to gently reshape them.

Use the side brushes only when they are completely dry.
Replace the Side Brushes

The side brushes may become bent or damaged after being used for a period of time. Follow the instructions below to replace them.

1. Use a Phillips screwdriver to unscrew the screws on the side brushes.
2. Pull off the old side brushes and snap the new ones into place.
3. Screw down the screws to fasten the side brushes.

Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>RoboVac cannot be activated.</td>
<td>• Make sure the main power switch is in the ON position.</td>
</tr>
<tr>
<td></td>
<td>• Make sure the battery is fully charged.</td>
</tr>
<tr>
<td></td>
<td>• Replace the batteries (2 AAA) in the remote control.</td>
</tr>
<tr>
<td></td>
<td>• Make sure the remote control is within range (less than 6 ft/3 m from RoboVac).</td>
</tr>
<tr>
<td></td>
<td>• If you still have trouble, turn off the main power switch and then turn it on.</td>
</tr>
<tr>
<td>The remote control does not work.</td>
<td>• Replace the batteries in the remote control.</td>
</tr>
<tr>
<td></td>
<td>• Make sure RoboVac is turned on and fully charged.</td>
</tr>
</tbody>
</table>
|                                              | • If RoboVac works properly but does not respond to the remote control’s commands, it may be because the remote control has not been paired with RoboVac. In this case, do not dock RoboVac to the Charging Base. Turn off the main power switch and then:
  (1) press and hold on the remote control for 3 seconds;
  (2) turn on the main power switch. You will hear three beeps after successful pairing. |
| RoboVac stops working suddenly.              | • Check if RoboVac is trapped or stuck on an obstacle.                   |
|                                              | • Check if the power level is too low.                                   |
|                                              | • If you still have trouble, turn off the main power switch and then turn it on. |
| You cannot schedule cleanings.               | • You can set the time and scheduled cleaning time via the EufyHome app.  |
|                                              | • Make sure the scheduled time has been set correctly.                   |
|                                              | • Check if RoboVac’s power is too low to start cleaning.                 |
| Suction power is weak.                       | • Check if any obstructions are blocking the suction inlet.              |
|                                              | • Empty the dust collector.                                              |
|                                              | • Clean the filter with a vacuum cleaner or a cleaning brush.            |
| RoboVac cannot be charged.                   | • Check if the Charging Base is plugged into the outlet.                 |
|                                              | • Dust off the charging contact pins with a dry cloth.                   |
| RoboVac cannot return to the Charging Base.  | • Remove objects within 3 ft/1 m of the left and right side and within 6 ft/2 m of the front of the Charging Base. |
|                                              | • When RoboVac is in the vicinity of the Charging Base, it will return more quickly. However, if the Charging Base is located far away, RoboVac will need more time to return. Please be patient as it works its way back. |
|                                              | • Clean the charging contact pins.                                       |
| The rolling brush does not rotate.           | • Clean the rolling brush.                                              |
|                                              | • Check if the rolling brush has been installed properly.               |
RoboVac’s movements or travel path are abnormal.

- Clean the sensors carefully with a dry cloth.
- Restart RoboVac by turning the power switch off and on.

RoboVac cannot connect to a Wi-Fi network.

- Make sure your Wi-Fi router supports the 2.4GHz and 802.11b/g/n bands; the 5GHz band is not supported. For more details, refer to the “Troubleshooting > Wi-Fi connection” section in this manual.

You cannot control RoboVac with Amazon Alexa.

- Check if there are any Internet connection problems.
- Check whether you have installed the Amazon Alexa app onto your smart device and enabled “EufyHome - RoboVac” Skill in the Amazon Alexa app. For details, refer to this section “Use Your RoboVac with Amazon Alexa / the Google Assistant (Optional)”.
- Make sure you have an EufyHome account.
- Make sure you are using correct Alexa voice-commands.
- The “EufyHome - RoboVac” Skill for Alexa is currently only available in English.

You cannot control RoboVac with the Google Assistant.

- Check if there are any Internet connection problems.
- Check if you have installed the Google Home app onto your smart device and initiated the “EufyHome” action in the Google Home app. For details, refer to this section “Use Your RoboVac with Amazon Alexa / the Google Assistant (Optional)”.
- Check if you are using the proper commands when talking to the Google Assistant. When making your request, first say the wake words “Ok Google”.
- Repeat your question. Speak clearly to the Google Assistant.

Error Tone

When RoboVac is in trouble, it will emit a series of short or long beeps and the red indicator on RoboVac will be solid or flashing.

Flashing red indicator light

<td>Tap RoboVac’s bumper several times to dislodge any debris that may be trapped underneath.</td>
</tr>
</tbody>
</table>

Wi-Fi Connection

Before Wi-Fi setup, make sure RoboVac and your Wi-Fi network meet the following requirements.

Wi-Fi Setup Requirements

1 RoboVac:
- RoboVac is fully charged and the main power switch on the side of RoboVac is turned on.
- Wi-Fi status light flashes blue slowly.

2 Wi-Fi network:
- Use the correct password for your network.
- Do not use a VPN (Virtual Private Network) or Proxy Server.
- Your Wi-Fi router supports 802.11b/g/n and IPv4 protocol.
- You are using a 2.4GHz router or a dual-band router that is configured to support a 2.4GHz frequency band. RoboVac does not support 5GHz frequency band.
  - If RoboVac cannot connect to the Wi-Fi network and you are using a 2.4/5GHz mixed network, switch to a 2.4GHz network for Wi-Fi setup. You can switch back once your setup is complete.
  - When connecting to a hidden network, make sure you enter the correct network name, SSID (case sensitive), and connecting to a 2.4GHz wireless network.
  - When using a network extender/repeater, make sure the network name (SSID) and password are the same as your primary network.
  - The firewall and port settings of your Wi-Fi router allow RoboVac to connect with the Eufy servers.
- Network Security Requirement
  - WPA and WPA2 using TKIP, PSK, AES/CCMP encryption.
  - WEP EAP (Enterprise Authentication Protocol) is not supported.
• Wi-Fi Channels
  - The FCC requires all wireless devices in the United States are operated on wireless spectrum channels 1-11.
  - Some countries outside North America can use spectrum channels above channel 11. Refer to your local regulatory agency to determine which channels are accessible.
  - A future software release will support access to channels above 11 for users outside North America. Until then, use channels 1-11.

If you cannot control RoboVac with your smartphone, find the solutions below to solve the problem. If the problem persists, contact the Eufy service center for help.

### Wi-Fi Status Light
